*Table 1: Structures and Bridges to be strengthened during the CIP*

1.3 Figure 1 below shows the locations of the highway Structures included in Table 1 above.

*Figure: 1 Location of CIP Strengthening*

*Strengthening Works Type*

1.4 The strengthening has been categorised into eight broad types. These outline the type of works, and the process for the design and procurement is described afterwards. Each type of strengthening is briefly described below:

- a) Strengthening Type A (5 No) - The Service Provider shall carry out a full deck replacement on these Structures. The Service Provider shall use prestressed concrete beams or an in situ reinforced concrete slab depending on the location.
- a) Strengthening Type B (7 No) - The Service Provider shall carry out partial deck reconstruction on these Structures. The Service Provider shall use additional prestressed concrete beams or an in situ reinforced concrete slab depending on the location.
- b) Strengthening Type C (2 No) - Concrete saddle over the existing masonry arch.
- c) Strengthening Type D (9 No) - The Service Provider shall carry out partial deck reconstruction over the Verge areas or replacement of infill material to Verges, depending on the location.
- d) Strengthening Type E (2 No) - Additional steel plating to structural elements.
- e) Strengthening Type F (1 No) - Structure to be infilled.
- f) Strengthening Type G (1 No) - Additional column pier supports added between the existing piers.
- g) Strengthening Type H (2 No) - Trief Kerbing and guardrailing to protect Verge areas.
