

Infection Prevention and Control Waste / sharps Management

Infection prevention and Control

- Health Technical Memorandum HTM 07-01 (2023) Safe Management of Healthcare Waste: (Safe and sustainable management of healthcare waste)
Contains the regulatory waste management guidance including waste classification, segregation, storage, packaging, transport, treatment and disposal.
- The Health and Safety (Sharp Instruments in Healthcare) Regulations 2013 outline the regulatory requirements for employers and contractors in the healthcare sector in relation to the safe disposal of sharps

Infection prevention and Control

Categories of waste:

- Healthcare (including clinical) waste – is produced as a direct result of healthcare activities e.g. soiled dressings, sharps;
- Hazardous (or special) waste – arises from the delivery of healthcare in both clinical and non-clinical settings. Special waste includes a range of controlled wastes, defined by legislation, which contain dangerous or hazardous substances e.g. chemicals, pharmaceuticals;
- Domestic waste – waste similar in composition to waste from household premises e.g. paper towels.

Infection prevention and Control

Black domestic waste such as tissues, packaging, food waste. Final disposal to Landfill.

Infection prevention and Control

Yellow and Black stripes (Tiger stripe) - hygiene waste e.g nappies, incontinence pads, stoma bags. Final disposal to Landfill.

Infection prevention and Control

Orange - consists of items which are contaminated or likely to be contaminated with infectious blood and/or body fluids. Final disposal following heat disinfection is to Landfill.

Infection prevention and Control

**Sharps with
Medicinal residue**

Sharps only

**Cytotoxic and Cytostatic
Sharps**
