

Roll-on-roll-off skips

Birmingham Commercial Waste Services can supply a roll-on-roll-off skip service for customers who generate large volumes of waste or have bulky waste and who can accommodate a large skip on site. Clean and tidy, these large skips will keep your waste contained improving the appearance of your site.

The thirty cubic yard capacity containers are supplied for:

- General waste
- Industrial & commercial waste
- Recycling materials
- Non-compactable waste

They are not supplied for:

- Construction waste
- Hazardous waste, i.e. fridges, televisions, asbestos, paint, plasterboard

The containers have rear doors for easy access to load by hand or machine.

For very high volume waste producers Birmingham City Council can service all sizes of portable and static compactors. Depending on the waste produced these services enable customers to save money by reducing the number of collections made, increase payload and reduce storage space.

	Height	Length	Width
30yd roll-on-roll-off	2.50m	2.40m	5.80m

To find out more about any of these services, just email our Commercial Waste team at commercialwaste@birmingham.gov.uk or give us a call on **0121 303 2894**.
