

Street cleaning services

We offer a comprehensive range of street cleansing services which are suitable for use on both hard and soft surfaces. The expertise and equipment used to keep the road and streets of Birmingham clean and tidy are available to hire at very competitive rates.

These services are already being successfully employed at many car parks, school playgrounds, industrial estates and private roads. Specialist indoor cleaning is offered to large factories prior to occupation and for special services from astro-turf to ornamental finishes.

Many customers find our sweeping services invaluable during the autumn to clear falling leaves, which can become hazardous. In the spring these services enable the effects of winter and wind-borne refuse to be removed, revitalising the environment.

These services enable customers to comply in every way with the requirements of the Environmental Protection Act 1990, Code of Practice on Litter and Refuse.

Large Mechanical Sweeper

This service is ideal for large car parks, playgrounds, industrial estates and private roads. With the ability to sweep and collect waste, it is ideally suited for cleansing larger areas.

Small Mechanical Sweeper

Its compact and manoeuvrable design means this sweeper is suitable for most locations; car parks, playgrounds, industrial estates and private roads. Its size makes compact sites/areas accessible, including certain types of indoor cleaning e.g. warehouses.

Hotwash Cleaner

This is the mechanised answer to many difficult problems; grease, bird droppings, dog fouling, graffiti and fly poster removal.

High pressure hot water is delivered to surfaces from spray bars under the vehicle or from a hand held lance. The addition of disinfectant to the water tank means the area is left hygienic and fresh smelling.

A cold water flushing service is also available for swilling large car parks and roadways.

Graffiti Removal

Using high-pressure water cleaning equipment combined with non-hazardous, environmentally friendly chemicals, we offer a cost effective solution for the removal of graffiti from a variety of surfaces.

Sharps Removal

We offer a comprehensive service for the safe removal and disposal of discarded needles and syringes from commercial premises, building sites, void/derelict properties, wasteland, car parks, gardens, parks etc.

Other services offered include:

- Site Clearance Teams
- Litter Picking
- Fitting of Litter Bins
- Litter Container Hire for Special Events
- Gully Interceptor Cleansing

Land clearance and site litter picking is also available for special events.

To find out more about any of these services, just email our Commercial Waste team at commercialwaste@birmingham.gov.uk or give us a call on **0121 303 2894**.
